- Core Modules: Business Analytics, Marketing, Financial Statistics, Accounting and Finance
- Societies: Southampton Air Squadron Society, DJ Society, Finance and Investing Society

A-Level Equivalent: Hungarian Matura, Avicenna International College 2025 | Budapest, Hungary
~Computer Science A, English A*, Mathematics A*, History B, Hungarian B

PROFESSIONAL EXPERIENCE

Accounting Summer Internship Full-time | New York City (Remote)
Summa San Inc. May-September 2025

- Served on a 3-person team responsible for budgeting, forecasting, and variance analysis of expenditure for a nonprofit fundraising event at the New York City MetLife Building, attending at the invitation of stakeholders, that secured funding for the following fiscal quarter.
- Delivered financial literacy education to children across four continents.

PYTHON PROJECTS

Gold Macro-Fundamentals Strategy | Real Yields, USD, and Inflation Expectations OLS Regression.

- Designed and walk-forward validated a macro-fundamental gold strategy regressing monthly gold returns on real yields, USD strength, and inflation expectations across a 2010–2025 sample.
- Found that USD strength, not real yields, was the most dominant driver of gold returns, reversing the initial hypothesis, and that the "fundamentals-only" model underperformed passive gold exposure on a risk-adjusted basis.

Alternative Markets Data Scraping | Polymarket Insider Data Scraping.

- Scraped open-source Polymarket data to identify accounts with unusually high historical win rates.
- Copied active positions that were deeply out of the money and available at low prices.
- Evaluated the effect of asymmetric payoffs, where a small number of successful trades offset multiple losses, resulting in a return of 55%.

Introduction to Financial Data Analysis | Quantitative Commodities Research

- Cleaned, analysed, and visualised financial data to investigate possible correlations between mean reversion strategy returns of seasonal commodities and SARIMA coefficients.
- Identified the limitations of descriptive technical analysis and became motivated to study regressive models and implement fundamental data.

OTHER EXPERIENCE

Bloomberg Trading Challenge October - November 2026 Southampton, UK

- Leverage FDA clinical trial result post dates to gain exposure to biotech volatility
- Procured historical FDA trial data to algorithmically test the probability and volatility of each test phase

CFA Institute x AmplifyME Investing Simulator Challenge September 2026 | Southampton, UK

- Placed 16th in a global asset management Simulation Challenge
- Learned how trading desks in investment banks interact with asset managers.

Elected Student Council President | Avicenna International College. September 2024 - May 2025 | Budapest, Hungary

- Elected president by members of the student council.
- Organised and hosted events for students and external stakeholders.

TECHNICAL SKILLS

Certificates | Harvard's CS50 Python, Stanford's ML Specialisation, Bloomberg Market Concepts
Python Skills: NumPy, Matplotlib, Pandas, Yahoo Finance, FredAPI, Sklearn
Skills: market and stakeholder analysis, report writing, financial management and investment, data analytics
